SCIENCE DAY

Explosions and experiments!

Come for a day to learn all about what makes different ingredients react and how they react.

Today is the day that we are going to put our science hats on and learn all about what makes different things react with one another.

Can you tell me what happened when you combine Yeast, Proxied Detergent and Water? What if we ad some food colouring to make it look a little more colourful? Well today we are going to find out.

Test your Hypotheses and theories with carefully planned experiments to make the children think about what will happen next.

Please pack additional clothes for your children. Today will get messy.

Sun Safe Tips

- **No Hat, not Play**

The Sun is hot this summer and we need to ensure that everyone is protected from the harmful UV Rays. All children will be unable to participate in any outdoor activities should they not have a hat with them for the day .

Please note that we are no longer loaning out any hats from the Centre as this has caused the children to rely on this and adds additional pressure on the staff to launder the hats after use.

- **Sun Safe, Appropriate Clothing**

Sun safe and appropriate clothing includes:

- Shirts with sleeve's
- Closed in shoes
- Clothing to be active in

Children who are not dressed in the Correct Sun Safe Clothing will either need to return home to change or remain inside for the entirety of the day.

It is a legal requirement for the children and Educators to be wearing enclosed shoes whilst onsite. If any children arrive in shoes that are not appropriate, you will unable to sign in until this is rectified.

The UV Rating

We update our UV Rating every day to ensure that we are following the best practice and avoiding dangerous and damaging sun rays.

You can find our UV Rating located on the Daily Journal. Next to this you will find our sun-screen station on the program table where you and your children will be able to apply your morning sunscreen
